Senior Data Analyst

📍 Budapest, Hungary ✉️ Get in touch

> *Senior Data Analyst with over 9 years of experience driving executive decision-making within international corporate environments. Proven track record of translating complex datasets into actionable business insights for C-level stakeholders across multiple European markets. Expert in bridging the gap between Business and IT through strategic KPI frameworks and cross-functional leadership.*

PROFESSIONAL EXPERIENCE

Pay10 EU

08/2026 – Present

Financial Specialist | Budapest, Hungary

- **BI Solution Development:** Build and maintain Business Intelligence solutions, supporting reporting-related projects across the organization.
- **Regulatory Reporting:** Prepare and validate regulatory and statutory reports - including central bank (Magyar Nemzeti Bank) reporting - while maintaining data quality controls and supporting audits and inspections.
- **Stakeholder Collaboration:** Partner with stakeholders to gather reporting requirements and support forecasting, budgeting, and performance analysis.
- **Reporting Automation:** Run complex queries and analysis, automate reporting processes, and deliver regular and ad-hoc insights for management decision-making.

Career Break

This site uses cookies for analytics. See my privacy policy. DECLINE ACCEPT

- **AI Upskilling:** Dedicated focused time to hands-on AI tooling and workflows, building practical fluency ahead of transitioning into a new field.
- **Personal Project:** Designed and built a personal website end-to-end using AI-assisted development, from concept through deployment.

Hyundai Motor Europe

10/2023 – 07/2025

Senior Data Analyst | Frankfurt am Main, Germany

- **Executive Insights:** Engineered a C-suite sales funnel report by unifying SAP, Siebel, and GA4 into a single data model — giving leadership a consolidated view of regional performance for the first time.
- **Infrastructure Optimization:** Led a full Tableau Server migration serving 50–200 users across European markets, delivering measurably faster processing speeds and dashboard load times organization-wide.
- **Data Literacy Leadership:** Launched and ran a Tableau mentorship program that scaled self-service analytics across regional teams, reducing ad-hoc analyst requests and empowering non-technical stakeholders.
- **Stakeholder Management:** Partnered directly with C-level leaders to cut time-to-insight for regional performance reviews by 30%.

Starschema

12/2019 – 09/2023

Data Analyst | Budapest, Hungary

- **Fortune 500 Consultancy:** Delivered high-impact analytics engagements for **Apple, GE, and BlackRock** — conducting rapid environment assessments and producing executive-ready insights under tight client deadlines.
- **Strategic Sales Support:** Led data and visualization design for a sports analytics POC targeting NFL and soccer teams; the engagement directly secured the **Los Angeles Rams** as a paying client.
- **KPI Standardization:** Designed and implemented global KPI frameworks adopted across international teams, achieving 100% transparency in management metrics.
- **Workshop Facilitation:** Delivered targeted data literacy workshops to non-technical stakeholders, raising reporting quality and reducing miscommunication between business and IT.

Intrum

07/2017 – 11/2019

This site uses cookies for analytics. See my privacy policy.

- **Strategic Business Pivot:** Partnered with the controlling team on a deep-dive cost analysis that identified a non-profitable business line — findings directly drove its discontinuation, contributing to a €0.5–2M cost impact.
- **Executive Education:** Built and delivered a suite of executive-level BI reports; mentored C-suite stakeholders on data-driven decision-making best practices.
- **Infrastructure Growth:** Contributed to the architecture of a centralized analytics infrastructure, accelerating data access for regional teams across multiple European markets.

Raiffeisen Bank

`01/2017 – 06/2017`

Fraud Risk Analyst Trainee | Budapest, Hungary

- **Process Automation:** Built an automated Excel-based customer ID verification tool for the fraud team, eliminating a manual, error-prone process and significantly improving departmental throughput and accuracy.
